Contact No: +91 9976393315

To:

Mr. Anbumani V

Assistant Professor (Selection Grade)

Department of Electronics and Communication Engineering

Kongu Engineering College

Perundurai – 638060, Tamil Nadu, India

Subject: Permission for collection and research use of goat milk samples

Dear Sir/Madam,

I, **C. Thangavel**, residing at Villarasampatti village, Erode District, Tamil Nadu, hereby confirm that I have permitted **Mr. Anbumani V, Kongu Engineering College, Perundurai**, to collect or obtain goat milk samples from my farm for the research study entitled **"AI-Driven RGB-Temporal Image Processing Framework for Real-Time Milk Quality Assessment Using Edge Computing."**

I understand that the collected goat milk samples will be used for research involving the Methylene Blue Reduction Test (MBRT), controlled incubation, periodic image acquisition, RGB-temporal colour analysis, and machine-learning-based classification of milk-quality categories.

I grant permission for the following activities:

1. Collection or supply of goat milk samples for the stated research purpose.
2. Laboratory testing of the samples using the MBRT procedure and controlled incubation conditions.
3. Image acquisition and computational analysis of the samples for milk-quality classification.
4. Use of the resulting experimental data and research findings in academic publications, including the above-mentioned manuscript.

The samples are being provided with my knowledge and permission. The research team has not performed any additional experimental procedures on the goats as part of this milk-quality assessment study.

I understand that the milk samples will be used for scientific research and that this permission does not authorize the disclosure of my personal information beyond what is necessary for research documentation.

This letter is issued voluntarily to document the source of the goat milk samples and permission for their collection and research use.

Yours sincerely,

C. தங்கவேல்

(C. Thangavel)
